ACKNOWLEDGMENT

Bismillahirrahmaanirrahim

Alhamdulillahirabbilalamin

All praises and thank you to Allah swt, the Almighty God for his blessing and his help to the researcher could finish her skripsi. In the process of her study, she received support, advice, and assistance from my people. Therefore, the writer would like to extend her gratitude to the honorable people as follows.

1. The author's parents Suptiadi Rajulaini and Suarni, who have been raising, educating, and financing the Author in study activities from the primary school level until now,
2. Prof. Dr. H. Sagaf S. Pettalongi, M.Pd. as the Rector of State Institute For Islamic Studies (IAIN) Palu, along with the elements of leadership, who have encouraged and gave policies to the Author in the various ways.
3. Dr. Mohamad Idhan, S.Ag.,M.Ag. as the dean of Teacher Training and Tarbiyah faculty who has directed the Author in the lecture process.
4. Dr.Hj. Nur Asmawaty, S.Ag.,M.Hum. as the Dean of English Tadris department of IAIN Palu and also as the examiner who has provided input for further skripsi improvement.
5. Drs. Muhammad Ihsan, M.Ag. as the first Advisor and Ana Kuliahana, S.Pd.,M.Pd. as the second advisor of the writer. Who have guided the writer so that she could complete the writing of this skripsi.

6. Dra. Harlina, M.Si as the headmaster of SMA Negeri 6 Palu who has guided and allowed the Author to conduct the research at SMA Negeri 6 Palu.
7. All the Author brother and sister Munifah S rajulaini, Nur Afni S rajulaini, Riski S Rajulaini, Anatasya S Rajulaini, Syanti Toani Rajulaini, Nurwaida S Rajulaini and Moh Kadir. who supported the Author to complete the skripsi.
8. The Author classmate TBI First Batch 2015 for being the best support system for the Author from the first semester until now.
9. The Authors' best friend from senior high school until now Irfan Said, Siti Hardianti, and Lianly V Cindangen, for helped and supported the Author to complete the skripsi.
10. Irmawati,S.Pd and Mariani,S.Pd , who helped and supported the Author of complete this skripsi.

At the end, to all parties, the Author always pray that all the assistance given has received an infinite reply from Allah SWT.

ABSTRACT

Yulfanti S Rajulaini (15.1.16.0016) The Application of Group Discussion Method to increase Students' Interest in learning English (An Action Research to the Tenth Grade Students' of SMAN 6 Palu. Skripsi. English Tadris Department, Teacher Training and Tarbiyah Faculty, State Institute For Islamic Studies Palu, under the supervisor of Drs. Muhammad Ihsan, M.Ag, and Ana Kuliahana S.Pd, M.Pd.

The problem focus of this research is to Application of Group Discussion Method to Increase Students' Interest in Learning English. The object of this research was the tenth grade students of SMA Negeri 6 Palu. This research was quantitative research, and the procedure of collected the data were reconnaissance, planning, implementation, observation, reflection. The data analysis used is qualitative data. And the formula used to test was t-test with the level of significance 30-40. The result showed that the application of Group Discussion Method to Increase Students' Interest in Learning English. It can be proven with the result of test of significance (t-test) was cycle I 16 and cycle II 38 . It means the result of t-test is more than level of significance (30-40).Based on the conclusion above, suggested to the teacher especially English teacher is to use Group Discussion Method strategy or find out the other method to make the students interest to the material.

KEY WORDS: Application, Discussion, Increase, Interest.

CHAPTER I

INTRODUCTION

A. Background

English as an international language, has developed rapidly. In Indonesia, it has been taught as one of the compulsory subjects from the first year of Junior High School until university level, even in some areas, it is introduced from kindergarten. Besides, English is not only a compulsory subject in the School, but it is also one of the subjects examined in National Examination.

Teaching method in English have a very important role in the success of students in capturing lessons that have been given by the teacher. There are some students who understand what the teacher has taught and some who do not understand, do not catch or sometimes get bored with what is taught. Student interest will arises when a teacher teaches English using a lot of English during speaking, in this way students will more easily understand English words, how to say a word. And also when teaching a teacher the teacher should leave 10-15 minutes before the end of the meeting to make an exciting English game, the purpose of creating this game is so that students go not feel too fed up with the formal material that has been given.

English lessons are one of the lessons that use verbal abilities. Memory ability, and writing skills in composing the right words. Students who have high learning motivation in English subjects, will diligently study English language lessons, and be able to do homework. Success in the teaching and learning process can be measured by the success of students in participating in learning activities carried out.

The learning process is an important element for achieve success in learning. In the learning process of transformation of science and values. When the learning process takes places, there is interaction between the teacher and student which makes it possible for teachers to be able to recognize characteristics as well the potential of student. Likewise the opposite, at the time learning student have the opportunity to develop potential can be optimized. Therefore that, education is not longer providing a stimulus but an effort develop their potential. Knowledge is not given, will but built by student¹

To be able to recognize and develop students potential, of course in the learning process it needs active learning. Learning is not longer teacher-centered but student centered and the teacher is only a facilitator and mentor. Thus, students have extensive opportunities to develop their abilities such as expressing opinions, thinking critically, conveying ideas or ideas and so on.

¹ Wina Sanjaya. *Learning Process Orientation of the Educational process standar*. Jakarta:kencana media group.2009.

Active learning is needed by students to get maximum results. When students are passive, or only accept from the teacher there is a tendency to forget what was given instructor².

The use of media and learning method chosen by teachers is one way to improve the quality of learning. Hamalik³ also states that, "to more effectively communicate and interact between teachers and students in the process of education and teaching, schools need to use appropriate learning methods and techniques in schools."

Based on the opinion above, it can be concluded that the quality of learning will increase if the teacher is able to create learning conditions that are active, creative, and effective communication between teacher and students using the method of discussion w5th the right learning media.

However, the reality shows that the application of the discourse method and the use of media does not appear to be implemented optimally. This is indicated by the teacher only used the existing handbook and only relies on the lecture method, without using media that is in accordance with the material. As a result, activeness, participation, and student learning outcomes are low.

The low interest in learning English in students, especially in English subject is a problem that arises in learning activities can be viewed from

² Hisham Zaini.*Learning Process*.Yogyakarta:Insan Mandiri.2008.XIV.

³ Hamalik.*Learning Method*.Jakarta:PT Bumi Aksara.2001.32.

several aspects. Judging from the aspects of students, influencing learning outcomes arise from internal and external factors. According to Dimyati internal factor of students include attitudes toward learning, concentration of learning, processing learning materials, storing the acquisition of learning outcomes, exploring stored learning outcomes, ability to achieve, learning habits and students ideals, while external factors can be in the form of teachers, facilities and infrastructure, assessment, and school curriculum.

The low interest in studying tenth grade students of natural science at SMAN 6 PALU especially on English subjects, Classroom Action Research (CAR) will carried out with the title: Application of discussion method to increase student interest in learning English in tenth grade science students of SMAN 6 PALU. This method is able to increase the likelihood of critical thinking, participation, democracy, developing attitudes, motivation, and speaking abilities. By applying the discussion methods, it is expected to increase students interest in learning in English subject at SMAN 6 PALU.

B. Problem Statement

Based on the statement of discussion that mention above, this study will focus on the following main problems:

How did the application of discussion method increase interest in learning English for the tenth grade students of sciences class at SMAN 6 PALU ?

C. Objective of Research

Based on the formulating of the problem the objectives to be achieved in this study are as follows.

To find out an increase in student interest in learning in English language classes.

D. Advantages of Research

1. For student

From this study students gain a more meaningful learning experience, so that students become more active and eager to learn English with the application of discussion methods so that learning outcomes increase in English subjects.

2. For teachers

Information from the results of this study is expected to be valuable information and issues for teachers in making various efforts to improve the quality of learning processes and outcomes by applying discussion methods, especially in English subject and other subjects in general.

CHAPTER II

LITERATURE REVIEW

A. *The Definition of Discussion Method*

For everyone, community or community, discussion is a common thing, this discussion covers many things, one of conversation communication. Discussion can be an excellent strategy to increase student motivation , encourage intellectual agility, and encourage democratic habits. They create opportunities for students to practice and sharpen a number of skills, including the ability to articulate and defend opinions ,consider different points of view, and request.

Discussion according to Kochar¹, discussion was the existence of a vision of two people or more then interacted verbally and face to face, about the purpose of the discussion or the target given by exchanging or maintaining related information.

Discussion according to Moh Uzer Usman² discussion is a regular process that has involved a group of people to interact with each other, can originate with experience, information, conclusions, and solution to a problem discussed. Discussion a definition of discussion is a pr6cess in which students or people discussing will have an opportunity to discuss and contribute from their experience in solving

¹ Kochar, *Discussion Method Teaching and Learning*: New York.1985.

² Moh. Uzer Usman, *Professional Teacher*. Bandung: PT. Youth Rosdakarya.2005.

problems in general. In this discussion there must be responsibility for dignity of each person discussing them.

The method of discussion in the learning process is the most important part for creating creative thinking students, because discussion means exchanging ideas or issue a concept that can be used as reference. In scientific Dictionary Popular explained that the discussion was a joint discussion of a problem or exchange ideas to solve a problem Etymology understanding the discussion can enrich knowledge because by exchanging mind (transformation) knowledge between opinions with one another become one new knowledge. Then the word discussion becomes a discussion or exchanging ideas with each other, linkage the meaning contained in the word "discussion" is to finish or exchange ideas at a formal and non-formal meeting.

The learning process, present the subject matter through exchange of ideas. In line with that Abdul Majid in this book said that, method of discussion is a way of educating those who try to solve the problem at hand, either two or more people who submitted their arguments for each strengthen his opinion.

B. The Definition of Interest

The intention of learning is the psychological aspect of a person who manifests himself in several symptoms such as; passion, desire, enthusiasm, feeling, likes, to carry out the process of changing behavior through various activities which include seeking knowledge and experience, in other words the intention to learn is attention to liking, students' interest in the learning process they live in and which is

then shown through enthusiasm, participation, and activity in participating in the learning process. Interest is defined as will, desire or liking. Interest is something personal and closely related to attitude. Interest and attitude are the basis for prejudice, and interest is also important in making decisions. Interest can cause someone to actively go to something that has attracted their interest. Interest is a source of motivation that encourages people to do what they want if they are free to choose. So, interest in learning is the desire of the soul of an object with the aim of achieving the proper learning science. This illustrates that someone will not achieve the expected goals if in the person there is no interest or desire to achieve the expected goals. Interest is basically the acceptance of a relationship between yourself and something outside of yourself. The stronger or nearer the relationship, the greater the interest. In conjunction with learning activities, interest becomes the driving force for achieving the desired goals. Without the interest in learning objectives will not be achieved. Lack of interest in learning can result in a lack of interest in a particular field, it can even give birth to an attitude of rejection to the teacher. If a student has an interest in a particular lesson he will pay attention to it. But on the contrary, if students are not interested in the subjects being taught they are usually lazy to learn. Likewise, students who do not pay attention to the subjects being taught, it is difficult to expect these students to learn well. This certainly affects the learning outcomes. So, it can be said that interest is closely related to learning outcomes which can then be used as a driver to improve learning outcomes.

CHAPTER III

RESEARCH METHOD

A. Type of Research

This type of research is classroom action research (CAR), is a participant. The middle school is that people who will take action must also be involved in the research process from the start. This classroom action research uses a model of action research proposed by McTaggart. The action research process of McTaggart models is;

1. Reconnaissance
2. Planning
3. Implementation
4. Observing
5. Reflection

B. Place and Time of Implementation

This research will conduct in SMAN 6 PALU, in class tenth in the one semester of September or October 2019.

5. Reflection

The implementation of the research was carried out by means of collaboration, namely research involving other people besides the researcher, namely as observers (colleagues). The researcher uses the flow paths planning, action, observation are presented in two cycles.

This research was conducted in two cycles. The cycles is stopped if the data displayed in the field is saturated, meaning that if there is an increase in interest in English language learning students use the discussion methods.

F. *Stage of Research*

1. Stage 1 cycle Research

a. Planning

At this stage the researcher prepares a lesson plan for implementing the learning model for group discussion;

- 1) Permit the school and related subject teachers to apply the method of discussion in English subjects
- 2) Researchers conduct interviews with English teachers and students
- 3) Researchers coordinate with English class tenth teacher related to the place and time of research
- 4) The researcher prepares a theme or topic to be applied in the discussion later.

BAB IV

FINDINGS AND DISCUSSION

The research aimed to the application of group discussion method to increase students' interest in learning English for the tenth grade students of SMAN 6 Palu in the academic year of 2019/2020. This chapter presents the research findings and discussion. The findings of the research are presented in two sections. The first section discusses the reconnaissance step. Then the second one presents the implementation of the action and discussion.

A. Research Findings

The research findings present the description of reconnaissance and the implementation of the action in the teaching learning process. There were two cycles in teaching learning process, each cycle divided two meetings.

1. Reconnaissance

In this step, the research identified problems which occurred in the English teaching process at the tenth grade students of SMAN 6 Palu. The research identified problems related to the teaching of interest. The field problems were collected through a classroom observation, an interview with the English teacher, some interview with the students. To begin with, the research conducted a classroom observation on Saturday, September 21st, 2019.

After doing the observation, interviewing the English teacher and some students, the research did conclusions about the problems occurred in the class. Based

on the conclusions, the researcher identified some problems that were found in the field. First, the students lack interest in learning English. Second, they like to learn English. But, at school they provide very minimal facilities, they are even encouraged to buy books using their personal funds to add to their facilities.

After the field problems were identified, the researcher were focused on the teaching technique and the students. The problems were taken because it affected the students' interest. Therefore, the problems needed to be solved soon. It was expected that solving problems carried out improvements to their interest.

The implementation of action

After knowing the situation of the students, the researcher implemented the action by application of group discussion method. The classroom action research covered two cycles. Each cycle consisted four steps which includes: 1. Planning the action, 2. Implementation the action, 3. Observing the action, 4. Reflection the observation result. Every cycle was held in two meetings, and every meeting spent about 40-60 minutes. Topics discussed in the first and second cycle were what is like and Interest, what is Motivation. It was undertaken from September 21st until November 2 2019.

a. Cycle 1

1) Planning the action

The action plan for the first cycle was made based on the problem identified. The researcher conducted an action by using group discussion to increase

students interest. Before the action was implemented, the researcher prepared the lesson plan and everything related to action research.

2) Implementation the action

In the first cycle, the researcher explained about introduce yourself, make an example and asked them to make a dialog based on the topic. The first cycle was conducted in two meetings. The action was divided in three terms, namely opening, main activity, and closing.

a. The first meeting

1. Opening

On Thursday, 26th 2019, the lesson start at 12:30 am. I started by greeting the students, I said “Assalamu’alaiqum, good afternoon students!” the students answered, “Waalaikumssalaam, good afternoon too mem”. The chairman prepared the class there are say greeting and pray before study. Then, I checked their attendance list. After that, I make a short conversation with them like asking about their habits in the classroom.

Before I told them about what topic that we have to learn today, I introduce myself first. In this meeting, they were surprised to me. After that, I explained to them and make a short example conversation about the topic.

2. Main activity

Firstly, asked them about what is like and interest in bahasa. I said, “What is the meaning of like and interest in bahasa?” they ask each other questions. I asked one of students, Intan about what is like and interest?. Then, I asked Johan with same question. Finally, I asked them one by one. Some of them have a good the answer, but some of the also confused what should they said to like and interest.

3. Closing

Before I closed the class, I told them to find out how to like and interest in front of your friends and we were going to learn it next meeting. I said to them, “Next meeting kakak mau bagi kelompok, dek” they answered, “Iya kak”. The chairman prepared the class to pray before they were go home.

b. The second meeting

1. Opening

On Saturday, September 28th 2019, I start the lesson 08.45 am and I opened the lesson after all the students come to the class. The chairman directly prepared the class like giving greeting and pray before they were

studies. After that, I checked attendance list and make a short conversation with them.

2. Main activity

Firstly, I asked them about what lesson that we have been learn yesterday. I said, “Ada yang masih ingat materi kemarin?” they answered, “Masih kak, tentang apa itu suka dan minat”. I said, “Oke, thank you dek. Apa itu suka dan minat?” then, Canda said “Kalau suka hanya sekedar menyukai tanpa ingin di ketahui lebih dalam sedangkan minat suda tentu suka dan ingin mepelajarinya lebih dalam lagi”. “Good student, thank you so much, Canda.

I divided into 2 groups. Each group must made a short stories about people who like something and interests. Intan asked me, “Tentang apa kak yang mau di ceritakan?” “Tidak usah jauh-jauh angkat cerita yang ada di sekitar kalian saja, yang jelas itu berkaitan dengan kata suka dan minat”. The class was very noisy. The student read short stories that they have already made. “attention please, kakak akan menilai accuracy dengan pronunciation nya kamu dek. Jadi pronunciation itu adalah pengucapan kata dan accuracy ini adalah ketepatan dek. Nah, ketepatan yang di maksud adalah kemampuan kamu menempatkan cerita yang bersangkutan dengan suka dan minat. Then, they were present their group in front of the class.

3. Closing.

I closed the class before the bell rang. I asked them about what subject that we have been learn today. Intan said, "pengertian suka dan minat, kak" I said, "ok, thank you Intan. What else?" The situation were silent. "Ada lagi?" Ayu said, "Tentang ketepatan dalam menempatkan sesuatu yang di sukai dan yang di minati, kak" "Ok, thank you so much, Ayu". After that, the chairman prepared the class for greeting and say thanks to the teacher.

3) Observing the action.

Observation results in cycle 1 high-interest students as much 6 out of 20 students. The second meeting of students who height of 10 students' out of 21 students' in attendance.

a. First Meeting

$$= n : N \times 100$$

$$= 6 : 60 \times 100$$

$$= 10$$

b. Second meeting

$$= n : N \times 100$$

$$= 10 : 60 \times 100$$

$$= 16$$

In this cycle you can it is said that students' learning interest still not optimal because only few students' have indicator of high learning interest.

4) Reflection the action result

From the observation above, it showed that the result of cycle 1 needed to improvement. There were any problems that needed to be solved in the next cycle. Some of students had difficulties in making conversation with their friends because they don't know how to pronounced the word. Besides there some students who did not make a conversation with their friends because they were lack in confident and vocabulary

Table 1: action to solved the problem

NO	Problem	Action
1	Students only like English but they are less Interested in learning English.	The application of group discussion method in learning English.

2	The students do not know English vocabulary.	The researcher give students assignments about what is like and interest.
---	----------------------------------------------	---------------------------------------------------------------------------

Based on the result of reflection cycle 1, recommended corrective actions for cycle 2 as follow:

There needs to be an improvement in planning learning by forming 4 groups where every group leader are students who have highest learning outcomes on results cycle 1 test, for increase percentage of interest students' learning (interest categories high) in the process learning and at next meeting. And provide guidance that is more during the discussion process.

5) Field Notes

Researcher : Yulfanti S Rajulaini

Skill : Interest

Day : Saturday, September 28st 2019

Time Observation : 08.45

Method : Gtoup Discussion

a. Pre-teaching

- 1) The researcher come to the class at 08.35

- 2) The researcher greeted the students by saying "Assalamualaikum"
 - 3) The researcher checked the attendance of students.
 - 4) The researcher gave some explanation about the material that would be studies
- 5) The researcher used two languages, English and Indonesian in explaining the lesson, but Indonesian was used more than English when the researcher was teaching.

b. While-teaching.

- 1) The researcher asked the students to make a conversation about the topic.
- 2) Several representative of students in pairs were to practice the conversation.
- 3) After that, the researcher asked the students to make a group.
- 4) After that, the students in groups presentation their short story.
- 5) The researcher took the score of the students one by one from their performance

c. Post-Teaching

- 1) The researcher tried to review the subject and asked the students to study again the subject given that day at home.

- 2) The teacher closed the class by saying "Wassalamualaikum and see you next meeting"

Based on the problem that identified in the first cycle, tried to makes a discussion with an expert and English teacher about what step that the researcher do in the text cycle. The result of the discussion were the researcher have to change the management class and try a new topic for them. An expert asked me, "So, if your students have a problem like that, what should you do?" I answered, "I will give them motivation to study more and make the class enjoyable and I teach them the beauty of learning English if we have an interest". Finally, our discussion were finished.

b. **Cycle 2**

1). Planning the action

The action plan for the second cycle we held based on the problem occurred in the first cycle. The problem were (1) the students still lack in vocabulary (2) the students lack enthusiasm for the lesson (3) the students pay less attention.

Before doing the cycle 2, I should create different tack. I changed 2 groups become 4 groups. The technique made the student more focus with their group.

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

The conclusion of this research is to increase students interest of the tenth grade students of SMAN 6 Palu in academic year of 2019/2020 by implementing group discussion. After carrying out all the process of this research, there are some conclusions that can be drawn. They are presented as follows:

1. The low interest of the tenth grade students of SMAN 6 Palu was caused by the lack of happy feelings, lack of student attention. Teacher rarely gave them opportunity to learning interest.
2. The application of group discussion could increase students' interest. It was fun activities that the students got new activities in the classroom.
3. The use of group discussion in the classroom, it makes the class alive because the students as a participate and they can become anyone or in any situation they wish.
4. With an increase in interest students have an impact on improvement in students learning outcomes. Increase students interest cause an increase students ability in mastering the concept of learning, increase students desires ti compete in the submission his thought ideas and improve the ability og students' criteria thinking.

B. Suggestion

The success in teaching doesn't depend on the lesson program only, but more important is how teacher present the lesson and uses various technique to manage the class more lively and enjoyable. After concluding the result of research, the researcher would like to propose some suggestion to the following:

1. English teacher

The teacher can divide the students into group to make them more communicative and active in joining the class. The application is the teacher not as teaching them, but also their facilitating in the class. The English teacher should present the language in an enjoyable, relaxed, and understandable way.

2. The students

The application of group discussion method to student interest. The students should be more in a group. The students should take part much in eating out group discussion.

3. The other researcher

Since the researcher conducted the research in senior high school, the other researcher may conduct this research in other levels such as collage student which have different characteristic than senior high school.

Struktur teks

1. (ungkapan hafalan, tidak perlu dijelaskan tata bahasanya) *What is your name?, My name is..., dan semacamnya*

E. Metode Pembelajaran

Group Discussion

F. Media,

- 1) Buku guru
- 2) Buku siswa

G. Alat dan Sumber Pembelajaran

- 1) Papan tulis
- 2) Suara guru

G. Langkah-langkah Pembelajaran:15

Pre-activity (kegiatan awal)

1. Guru menyapa siswa;
2. Guru mengatur kelas (posisi duduk siswa, kebersihan kerapihan dan kesiapan menerima pembelajaran) (menggunakan ungkapan untuk menarik perhatian);
3. Guru mengecek jumlah siswa yang hadir dan yang tidak hadir;
4. Guru menunjuk salah satu siswa yang memimpin doa sebelum memulai pelajaran;
5. Guru memberi motivasi untuk membangkitkan semangat dan kesiapan siswa untuk belajar;
6. Guru menyampaikan tujuan belajar (Dengan didahului mengingatkan tentang ungkapan yang telah diekspresikan di sesi classroom management./Asking: what is your name?/Menampilkan tujuan pembelajaran).

While-activity (kegiatan inti) 30

1. Mengamati
 - a. Siswa mendengarkan /membaca penerapan jati diri dengan memperhatikan fungsi sosial ,struktur test unsur kebahasaan,maupun format penyampaian/penulisannya.
 - b. Guru memberikan contoh bagaimana cara membaca ungkapan perkenalan diri tersebut dengan intonasi dan tekanan kata yang baik dan benar.
2. Menanyakan
 - a. Siswa diberi kesempatan bertanya tentang hal-hal atau, kosakata yang berhubungan dengan topik pembelajaran yang belum mereka mengerti dan ketahui.
 - b. Siswa diberi konfirmasi dan penjelasan tentang hal-hal, kosakata yang berhubungan dengan topik pembelajaran.

H. Penilaian Pembelajaran

Teknik Penilaian: Proses

1. Lembar Pengamatan Sikap

No	Nama Siswa	Semangat				Disiplin				Tanggung Jawab				Total
		4	3	2	1	4	3	2	1	4	3	2	1	
1														
2														
3														
4														
5														

Keterangan: 4 =Selalu (very good)
2 =Kadang-kaadang (enough)

3= Sering (good)
1= Tidak pernah (poor)

Untuk Penilaian sikap Spiritual dan Sosial (K1 dan K2) menggunakan penilaian kualitatif sebagai berikut:

SB	= Sangat Baik	80 – 90
B	= Baik	70 – 79
C	= Cukup	60 – 69
K	= Kurang	< 60

2. Lembar Penilaian Pengetahuan

No	Nama Siswa	Tujuan Komunikatif				Pilihan Tata Bahasa				Total
		4	3	2	1	4	3	2	1	
1										
2										
3										
4										
5										

No	Aspek yang dinilai	Uraian	Skor
1	Tujuan komunikatif	<input type="checkbox"/> Menulis ungkapan dengan sempurna. <input type="checkbox"/> Terdapat beberapa kesalahan dalam penulisan ungkapan. <input type="checkbox"/> Kurang memahami ungkapan yang ditulis. <input type="checkbox"/> Tidak memahami sama sekali sehingga tidak bisa menulis ungkapan.	4 3 2 1
2	Pilihan tata bahasa	<input type="checkbox"/> Menulis ungkapan sederhana dengan tata bahasa yang tepat. <input type="checkbox"/> Menulis ungkapan sederhana dengan sedikit kesalahan tata bahasa.	4 3

		4	3	2	1	4	3	2	1	
No	Aspek yang dinilai	Uraian								Skor
1	Pilihan tata bahasa	<input type="checkbox"/> Dalam menyusun kalimat menggunakan kata tata bahasa yang sangat tepat.	<input type="checkbox"/> Menggunakan tata bahasa yang cukup tepat.	<input type="checkbox"/> Menggunakan kosa kata yang kurang tepat.	<input type="checkbox"/> Menggunakan tata bahasa yang tidak tepat.					4
2	Kerapihan tulisan	<input type="checkbox"/> Menulis teks sederhana rapih dan mudah terbaca.	<input type="checkbox"/> Tidak rapih tapi mudah terbaca.	<input type="checkbox"/> Tulisan tidak rapih dan tidak terbaca.	<input type="checkbox"/> Tidak bisa menuliskan ungkapan ‘It’s me’ dalam bentuk deskriptif.					4
										3
										2
										1

5. Mengkomunikasikan

- a. siswa diminta untuk mempraktikan materi yang diajarkan
- b. Guru melakukan penilaian

Post – activity

1. Guru meminta siswa menyimpulkan materi yang telah dipelajari dengan meminta menyebutkan kembali kata-kata atau ungkapan yang digunakan dalam memperkenalkan diri
2. Guru menutup pembelajaran
