Kepada: Gusnarib Gusnarib <gusnarib.io@gmail.com>

Dear Gusnarib,

We have received the comments from the reviewers.

*The manuscript should be sent for revision.**The authors should clearly justify a very small sample of the study.**It is necessary to justify the validity of a qualitative study. It's not enough just to write "data were then analyzed through reducing, displaying, verifying, and concluding".**It is not written what it means in the second table M1, M2, M3, M4, M5**Why is there no interest in the third table (authors should be consistent in presenting all the results)?*

We will be waiting for the corrections.

Have a good day.

Best regards,

Violetta Molchanova
