Comments

This paper is well organized and followed the manuscript guidelines of the journal to a large extent. The introduction section is good and shows the importance of the study. Literature review is adequate. Outcomes of the study are consistent with the findings. The approach used is praiseworthy. In my opinion, it should be published with no revision although implication to the research needs to be explicit.

Comments

I have now looked at the paper. The abstract, key words are OK. The paper is relevant to the theme of the journal and will contribute to academic debate. The paper is well structured and the APPROACH used for the study are sound. In my opinion, the subject matter of research problem is highly appreciable. It will surely make a contribution to the relevant field of research. The presentation of thoughts in the paper is notable. The paper should be published with no significant revision.
